## **ProSoft Technology® Releases the Modbus TCP/IP to PROFIBUS DPV1 Gateway for Schneider Electric® Modicon® M340™ Processors**

*New ease-of-use features reduce engineering demands and time-to-deployment while creating a more tightly integrated network.*

**BAKERSFIELD, Calif., June 2009** – ProSoft Technology® is pleased to announce the release of the new Modbus TCP/IP to PROFIBUS SE Gateway (5204SE-MNET-PDPMV1), designed with special features to better support and easily integrate with Schneider Electric® Modicon® M340™ processors. The gateway offers the new Application Communication Logic (ACL) feature built into the latest ProSoft Configuration Builder (PCB) software. The ACL feature automatically generates Derived Function Blocks (DFBs) specific to the user's application containing all logic required by the processor to manage cyclic and acyclic communication. The user can then import the files into the Unity™ Pro version 4 software without a single modification and without the burden of writing communications message logic.

Once the gateway and the network are operative, the acyclic pass-through feature allows processor-to-slave messaging without additional programming. Should the user need to make changes on the network, the gateway will regenerate the DFB files for import so that the user need not worry about the logic to communicate with the gateway.

These ease-of-use features reduce engineering demands and time-to-deployment while creating a more tightly integrated and secure network infrastructure.

All ProSoft Technology® products come with a three year warranty and unlimited technical support. For information on solutions for Schneider Electric platforms, call +1-661-716-5100, email [info@prosoft-technology.com](mailto:info@prosoft-technology.com) or visit [www.prosoft-technology.com](http://www.prosoft-technology.com).

### **About ProSoft Technology**

ProSoft Technology® designs industrial communication solutions that connect automation products seamlessly. ProSoft Technology is a highly diversified, customer intimate, global organization with a focus on quality and ease-of-use. Their products—including in-chassis communication modules, stand-alone protocol gateways, and a wide range of robust, field-proven wireless solutions—are found in applications spanning the industrial marketplace.
