

Softing Industrial Automation acquires product portfolio Industrial Communication of Trebing + Himstedt

Softing complements existing product offer, particularly for PROFINET and Industrial Ethernet Monitoring

Haar, April 30th, 2014 – Softing Industrial Automation GmbH, a leading provider of industrial communication technologies and products for network diagnostics takes over the product portfolio Industrial Communication of Trebing + Himstedt, effective from May 1st, 2014.

Through this take Softing complements the existing offer particularly in the area of network diagnostics. Amongst others the acquired program comprises products for monitoring industrial networks. These products enable specifically the users of PROFIBUS, PROFINET and Industrial Ethernet to realize state-of-the-art Asset Management solutions for maximizing the availability of their manufacturing facilities.

As a leading SAP Manufacturing Partner, Trebing + Himstedt has decided to focus on its business unit “Manufacturing Integration” in order to concentrate more intently on the growth market Manufacturing Execution Systems (MES) with SAP.
