

## **Automated Solutions Adds Modbus Master Driver to Industrial Communications Component for .NET**

*ASComm.NET Supports Multiple Major Industrial Protocols*

Santa Rosa, Calif., March 1, 2010 – Automated Solutions has added a Modbus RTU and ASCII Master driver to the company's ASComm.NET software component for industrial communications. ASComm.NET now implements driver support for

- Modbus RTU & ASCII Master
- Modbus/TCP Master
- A-B Logix family of processors via Ethernet
- A-B PLC5, SLC500, and MicroLogix via Ethernet
- GE SRTP

HMI / SCADA Developers, System Integrators, IT Developers and Machine Builders now have a runtime-free\* option for creating HMI, control, and supervisory control applications in Visual Studio.NET. ASComm.NET provides the communications link between .NET applications and industrial controllers, PLCs, and instrumentation.

ASComm.NET can be used in Windows, console, service, and web applications. All drivers are self-contained; no third party driver purchase is required.

The Modbus RTU & ASCII driver supports connection to Modbus RTU & ASCII Slave devices via serial communications port, encapsulated TCP/IP, and encapsulated UDP/IP.

Several purchase options are available including Full Development License for building runtime-free\* applications and an economical Single Machine Development/Runtime License priced at \$99.

Additional planned drivers targeted for Q2/10 include Siemens S7, Automation Direct ECOM Ethernet, and A-B Serial DF1.

Visit our website for additional information or to download fully a functioning 30-day trial version. <http://automatedsolutions.com/products/dotnet/ascomm/>

Automated Solutions, Inc. has delivered software solutions to the Industrial Automation market since 1994.
