

Automated Solutions Adds Unsolicited Message Support to A-B Drivers for .NET

ASComm.NET Supports Multiple Major Industrial Protocols

Santa Rosa, Calif., Mar 10, 2015 – Automated Solutions has added unsolicited message support for A-B Logix Family, PLC5, SLC500, and MicroLogix to the company's ASComm.NET software component for industrial communications.

Unsolicited message support allows you to use PLC MSG instructions in your ladder logic to write unsolicited data to your PC application via the ASComm.NET library.

ASComm.NET unsolicited message support supports both atomic and structured (UDT and PDT) data transfer.

Example applications with VB and C# source code that demonstrate unsolicited message handling is included with trial and purchased software.

ASComm.NET now implements driver support for

- A-B Logix family and Micro 800 series of processors via Ethernet
- A-B PLC5, SLC500, and MicroLogix via Ethernet
- GE SRTP Ethernet
- Modbus RTU & ASCII Master
- Modbus/TCP Client
- Siemens S7 Ethernet (S7-200, 300, 400, 1200, 1500)

HMI / SCADA Developers, System Integrators, IT Developers and Machine Builders now have a runtime-free* option for creating HMI, control, and supervisory control applications in Visual Studio.NET. ASComm.NET provides the communications link between .NET applications and industrial controllers, PLCs, and instrumentation.

ASComm.NET can be used in Windows, console, service, and web applications. All drivers are self-contained; no third party driver purchase is required.

Several purchase options are available including Full Development License for building runtime-free* applications and an economical Single Machine Development/Runtime Licenses starting at \$99.

Visit our website for additional information or to download fully a functioning 30-day trial version. <http://automatedsolutions.com/products/dotnet/ascomm/>
