ProSoft Technology is bringing Modbus® and PROFINET® together with four new gateways

Bakersfield, Calif., July 7, 2015 – Need to connect PROFINET and Modbus devices?

ProSoft Technology has four new gateways that help users do just that:

- If you have Modbus devices on several networks, our **PROFINET Device to Modbus Serial Gateway with four Serial ports** can help.
- Want to avoid changing IP addresses to have your OEM machine communicate with your PLC? The **Modbus® TCP/IP to PROFINET Device Gateway** allows users to do just that by communicating with devices that are on two different subnets.
- If you need to connect to a single serial network, the **Modbus Serial to PROFINET Device Gateway** is the answer.
- If your devices are all on the same subnet, our **Modbus TCP/IP to PROFINET Device Gateway** is ideal.

All four gateways enable bi-directional data transfers. The gateways support disaster recovery through an optional SD card, allowing for configuration recovery if an issue arises. For more information about the gateways, visit <http://psft.com/A83>.

These gateways join our PLX30 family of gateways, which also includes the EtherNet/IP™ to PROFINET Device Gateway.

ProSoft Technology: Where Automation Connects

ProSoft Technology specializes in the development of industrial communication solutions for automation and control applications. Our primary focus is to provide a connectivity interface that links dissimilar automation networks as seamlessly as if they were all from the same supplier. Essentially, ProSoft Technology products act as an interpreter so data can flow easily between machines that speak different languages. ProSoft Technology products include plug-in interfaces for large automation suppliers' controllers such as Rockwell Automation®, as well as stand-alone gateways and industrial wireless solutions. ProSoft products can be found in nearly every industry that employs automation. Starting with one computer chip in 1988, ProSoft Technology now has over 400 products supporting more than 60 different industrial computer languages. Our goal is to support our customers from pre-sales through the entire life-cycle of the application. With 500 distributors in 52 countries and Regional Offices in Asia Pacific, Europe, the Middle East, Latin America and North America, ProSoft Technology is able to provide quality products with free technical support to customers worldwide.
