ProSoft Technology's Industrial Hotspots: Communication Solutions for IT and OT

Bakersfield, Calif., January 13, 2016 – ProSoft Technology's Industrial Hotspot radios are the rare solutions that will make both worlds – IT and OT – happy.

Our radios feature SNMP support, which your IT personnel will like. On the OT side, the radios' new EtherNet/IP™ embedded object and Modbus® agent support enables users to get radio diagnostics into their PAC/PLC, where the data can be analyzed and acted upon, helping to reduce downtime.

The radios now feature Ultra-Fast access point switchover times of less than 10 ms, which is ideal for automated storage-retrieval systems, automated guided vehicles, automotive skilnet lines, and more.

ProSoft Technology: Where Automation Connects

ProSoft Technology specializes in the development of industrial communication solutions for automation and control applications. Our primary focus is to provide a connectivity interface that links dissimilar automation networks as seamlessly as if they were all from the same supplier. Essentially, ProSoft Technology products act as an interpreter so data can flow easily between machines that speak different languages. ProSoft Technology products include plug-in interfaces for large automation suppliers' controllers such as Rockwell Automation® and Schneider Electric®, as well as stand-alone gateways and industrial wireless solutions. ProSoft products can be found in nearly every industry that employs automation. Starting with one computer chip in 1988, ProSoft Technology now has over 400 products supporting more than 60 different industrial computer languages. Our goal is to support our customers from pre-sales through the entire life-cycle of the application. With 500 distributors in 52 countries and Regional Offices in Asia Pacific, Europe, the Middle East, Latin America and North America, ProSoft Technology is able to provide quality products with free technical support to customers worldwide.
