

Automated Solutions Releases GE SRTTP Ethernet Driver for .NET

.NET Component Supports Multiple Major Industrial Protocols

Santa Rosa, Calif., December 17, 2008 – Automated Solutions has added a GE SRTTP Ethernet driver to the company's ASComm.NET software component for industrial communications. ASComm.NET now implements driver support for

- GE SRTTP Ethernet
- Modbus/TCP Master
- A-B Logix family of processors via Ethernet
- A-B PLC5, SLC500, and MicroLogix via Ethernet

HMI / SCADA Developers, System Integrators, IT Developers and Machine Builders now have a runtime-free* option for creating HMI, control, and supervisory control applications in Visual Studio.NET. ASComm.NET provides the communications link between .NET applications and industrial controllers, PLCs, and instrumentation.

ASComm.NET can be used in Windows, console, service, and web applications. All drivers are self-contained. No third party driver purchase is required.

Additional planned drivers include Automation Direct ECOM Ethernet, Modbus/TCP Slave, Modbus RTU/ASCII Master, Profinet, and A-B Serial DF1.

Visit our website for additional information or to download fully a functioning 30-day trial version. <http://automatedsolutions.com/products/dotnet/ascomm/>
