EtherMeter™ Compatible With FM MAG 8000 Magnetic Flow Meter From Siemens.
St. Louis, Missouri
14 June 2011.

SCADAmetrics is pleased to announce that its EtherMeter SCADA/Meter Gateway is verified compatible with the FM MAG 8000 magnetic flow meter, manufactured by Siemens Industry.

The FM MAG 8000, a battery-powered, flanged magnetic flow meter by Siemens, was introduced to solve a wide range of industrial and commercial custody transfer flow measurement applications.

In a divergence from most available magmeters, the FM MAG 8000 features the ability to communicate total consumption readings via the popular “Sensus” AMR protocol – a capability that makes it compatible with both the EtherMeter and most AMR systems.

As a consequence of EtherMeter compatibility, the FM MAG 8000 can now be read using a wide range of industrial protocols and interfaces, including MODBUS/TCP, MODBUS/RTU/ASCII, and Allen Bradley’s DF1 and EtherNet/IP™.

The EtherMeter’s Compatibility Matrix has been updated to reflect the addition of this new meter. All testing was performed using a meter provided courtesy of Siemens Industry (Spring House, PA).

For more information on the FM MAG 8000, please contact Brian Roughan at Siemens Industry: (631)231-3600

ABOUT SCADAmetrics –
SCADAmetrics is the manufacturer of the EtherMeter™ SCADA/Meter Gateway – the device that enables Telemetry and SCADA System Integrators to read municipal and industrial water meters using MODBUS® and Rockwell Automation industrial protocols.
